

Taylor Pro High Temperature Digital Thermometer

Ensure your meat, fish and poultry is cooked right the way through with the Taylor Pro Digital High Temperature Thermometer.

By inserting the stainless steel probe into the centre of your food, this thermometer will provide an instant accurate internal temperature reading.

The easy-to-read digital display shows temperature readings between -40°C and 260°C (-40°F and 500°F).

The Taylor Pro Digital High Temperature Thermometer is 15 cm in length. It requires 1 x LR44 battery, which is supplied.

A plastic storage case with pocket clip is supplied, providing safety and portability.
